

MODERN

Octagon Seating Riser System

Advantages of Modern Nisso Seating Riser System

- Erection is fast & easy, no craneage is required, both suitable for outdoor and indoor use.
- More leg space each row 786mm wide – ease of access and improve safety.
- Better view angle (25.5 degree).
- High quality (PE H/D) chair, robust & long lasting against UV.
- Intermediate landing platform is possible and sight line is maintained thoroughly.
- Aisle on the back, make access to different location or evacuation easy and safe.
- Installation of fences is easy & fast, no bolts & nuts are required for fixing.
- Less components for simple & easy erection and inventory control.
- Less small parts to reduce material loss.
- High loading capacity [up to 7 kPa].

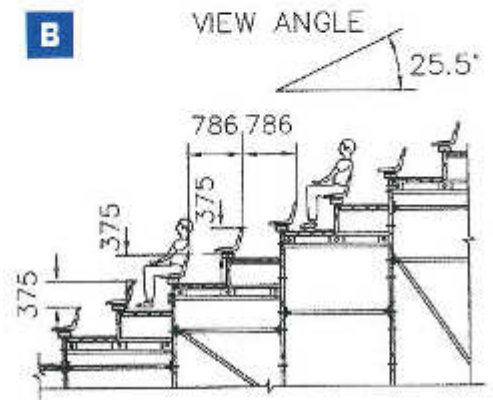

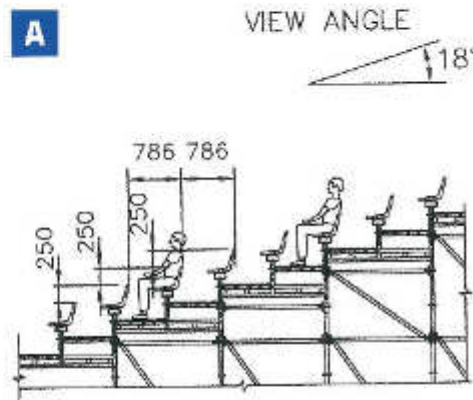

- Chairs can easily be inserted onto the bench with automatic locking system, more flexible in upgrading the bench-typed system to chair system in future using the same seating frames.
- Detachable top rail, guardrail height can therefore be easily changed from 1150 to 900mm. Better unobstructed view for the front row.

- Thanks to the modular & flexible design of Octagon support, the seating can easily be built on slopes or any uneven ground condition.
